WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Two plates 259 x 122, 16 mm, laser cut. Sizes from the back edge.

Hook 30 wide, centred 167 mm from the back edge; its round bottom 57 mm up from the lower edge; open to the upper edge.

18 mm holes: adapter 15 and 45 from the back, 50 each side of the axis (72 up from the lower edge); nose at 244; stop at 167 and 197, 20 up from the lower edge.

Upper plate only: four 13.5 mm fixed blade holes and two 13.6 mm handle holes (drawn); the lower plate has neither.

Drill the shared holes with both plates clamped together.

Check: hooks line up when the plates are stacked.

RUBBLEJACK
