WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Tube 88.9 x 10, 150 long, ends square.

Two end plates 160 x 160 x 10, tube centred, fillet welded all round.

Under the bottom plate: a 70 mm spigot, 12 mm tall, welded on the centre;

it locates in the base plate's ring.

On the top plate: a ring 92 / 72, 15 tall, like the base plate's.

The tube wall sits right over the ring and under the cylinder

base, so the plates carry the load straight down.

Check: the end plates are parallel to 0.5 mm; it stands without rocking.

RUBBLEJACK
